PROFILE

Full Stack Developer with 3 years of professional experience building web applications and APIs, specializing in Laravel and Next.js. Experienced in booking platforms, e-commerce, authentication, payment integrations and mobile app APIs. Takes ownership of feature development, integrations, deployment and ongoing production support.

CORE SKILLS

Frontend: Next.js, JavaScript, HTML, CSS, Tailwind CSS, SASS, Alpine.js, responsive UI.

Backend & data: Laravel, PHP, REST API design, authentication, MySQL, Livewire.

Integrations & delivery: Payment gateways, web and mobile APIs, background jobs, Git, debugging, performance improvements and deployment.

PROFESSIONAL EXPERIENCE

The Web Addicts | Full Stack Developer | 3 years

- Developed and maintained production applications across frontend interfaces, Laravel business logic and REST APIs; took ownership of features, integrations and issue resolution.
- Implemented authentication and payment workflows, connected web interfaces to backend services, and supported production deployments and ongoing maintenance.

SELECTED PROJECTS

Bewe | Live Booking Platform beweapp.com

- Worked on a Next.js booking platform with Laravel APIs and merchant-side tools, covering branches, services, staff scheduling and availability management.
- Implemented booking status workflows, time-based availability, membership usage and promotion windows; handled UTC booking data and local-time display requirements.

PoolRewards | Ticket-Based Rewards Platform poolrewards.ng

- Built the web application and mobile backend APIs for a platform supporting approximately 200,000 app downloads and 50,000 active users.
- Implemented authentication, ticket generation and status handling, campaign availability, wallet transactions and Paystack/Monnify payment integrations.
- Developed background processing and push notifications to support campaign operations. [Mobile app](#)

Biosphere | E-commerce biosphereskincare.com

- Independently built the Laravel e-commerce application, including frontend UI, backend business logic, payment integration and checkout workflows.

Integrations & Platform Improvements | ABC & Patchi

- Built integrations and delivered feature improvements for shopwithabc.com and patchi.com, alongside ongoing maintenance, bug fixes and production troubleshooting.
